AT THE CASSIDY LUMBER YARD—

● We want to let the Didsbury folks know that some of the men now with us have invested enough money to help build the new building.

It seems to us that when people have money in a business they give better service.

So you can expect better service than usual from us.

W. Morton, A. Snyder, T. Morton, J. Morton.

Sparrow, W. McFarquhar, E. Brinton, R. Eubank, A. Peterson, Dr. Epp, L. Jenkins, Vern Wrigglesworth, T. Fox, H. Roberts.

Special note to skips: Until a new schedule is drawn up kindly fill vacancies from spare list, so these new members will get a fair share of curling.

DIDSBURY HOSPITAL BIRTHS

Born to Mr. and Mrs. M. Barnes on Saturday, Nov. 24, a boy.

To Mr. and Mrs. Martin Neufeld on Friday, November 23, a boy.

To Mr. and Mrs. C.G. Trusler on Friday, November 23, a boy.

STAN BROOKE HUNTS WITH BOW AND ARROW—GUN

Stan Brooke, operator of Western Archers, Didsbury, returned recently after spending almost four weeks in the Saunders Creek district hunting big game. For more than a week Stan hunted entirely with bow and arrow, but found game wily and hard to approach within the range of the archer's weapon. Stan finally succeeded in getting his moose and elk, but had to resort to the faithful .303 British to bag his game. The elk shot had 7 points and was one of the largest brought out of that area this season.

FALLEN TIMBER NOTES

A community social and card party will be held at the home of John Teynor on Friday evening.

Mrs. John A. Howton is spending a week with her parents in Calgary.

Mrs. Alex MacKenzie of Bowden is visiting at the home of Mrs. Alex Moore.

Mr. H. Howton was a Didsbury visitor last Monday.

Ray Teynor and Bill Roberts are moose hunting.

Alex Moore has returned from a hunting trip on the Panther, with a full quota of game.

Among other activities we notice Bill Smith's truck taking out a load of cattle, and Bill McGaffin's truck taking out a load of mine props.

Mrs. Bill McGaffin was returned from a week's visit with relatives in Calgary.

Glenn Webb was a Cremona visitor last Saturday.

Wayne Stinger and Charley Steen are cutting wood on a government lease.

A bull moose was seen on Friday last close to the residence of P.J. Fair. He was evidently looking for a hunter's license.

Mrs. and Mr. Art Rothwell of Didsbury were in the neighborhood the beginning of the week looking after business matters.

John Teynor has been on the sick list for a few days but is OK again.

The modern way of moose hunters these days is a tractor with a bob sleigh containing camp equipment, and women cooks.

The roads are getting pretty well broken open and trucks are busy hauling mining props.

Mrs. O.O. Moore of Bergen was a visitor at the McGaffin home on Sunday.

Mr. and Mrs. J.A. Howton returned home from Calgary Sunday evening, where they have been visiting Mrs. Howton's parents.

While John Howton was driving into Didsbury on Friday afternoon last he had the misfortune to lose a hind wheel on his car, turning the vehicle into the deep unprotected ditch close to the August Krebs place. No further damage was done than the difficulty of getting back on the road again.

Cassidy's truck from Didsbury is hauling lumber from McGaffin and Howton's sawmill.

NEW COFFEE SHOP TO BE COMPLETED BY XMAS

Mrs. Thora Mjølness has three carpenters working steadily on her new coffee shop next to the Hiway Service Garage and expects the premises to be ready for occupation by Christmas.

At present Mrs. Mjølness is operating the coffee shop in the Hiway Garage.

REV. QUINTON J. EVEREST, TO SPEAK AT M.B.C. CHURCH

Special services will be held at the M.B.C. Church, Didsbury commencing Thursday, November 29th and continuing through to Sunday, December 9th.

Rev. Quinton J. Everest, Evangelist of South Bend, Indiana, outstanding radio evangelist, will have a real message for the people of our time and you are cordially invited to come and hear his messages. Services will be held each evening at 8 o'clock, and on Sunday at 2:30 and 7:45 p.m.

WELCOME HOME PARTY FOR SHERRILL NELSON

A welcome home party was held in the Springside school on November 21, 1948, in honor of Sherrill Nelson, third son of Mr. and Mrs. Eric Nelson, who has recently returned from overseas.

Sherrill served three years overseas, seeing action in Egypt, Italy, France, Germany and Holland.

Dancing was the main entertainment during the evening. At midnight a delicious lunch was served after which Sherrill was presented with a purse of money from his many friends.

The crowd sang: "For He's a Jolly Good Fellow," and Sherrill then gave a very pleasing address of thanks. Dancing was resumed until the "wee sma' hours" and everyone went home happy.

The sponsors of the gathering wish to thank all those who so generously contributed to the success of the evening.

BURNSIDE NEWS NOTES

Well, it looks as if the chinook has reached us at last and we are thankful for the release of the bad cold spell of the last month.

We are sorry to say our good neighbor Iver Weber, who kept our coal bins filled during the cold weather with his continuous trips to the coal mine, is on the sick list this week with a severe cold. We hope it won't be long till he is up and around again.

Mr. Pat Spraggs made his usual monthly trip Tuesday to Keith Sanatorium to visit with his wife. He has to act as mother and Santa Claus for his three little girls who are doing some Christmas shopping in the city.

George Long spent the week end in Didsbury.

Mr. and Mrs. Persinger of Olds, visited Sunday with their daughter, Mrs. Iver Weber.

Mr. and Mrs. Mike Nelson are caretakers of the Boulton farm this winter.

We have heard that there will not be a Christmas concert at the Burnside school this year. The kiddies will be at a loss to know what happened to Santa Claus.

Mr. and Mrs. Pete Schumaker had quite a gathering of friends at their home on Sunday.

Pete Dick Page is convinced that the month of November is his lucky month. He joined the services in November; went overseas to England in November; went to Italy in November; and returned home in November in good health, to marry the girl he left behind him November 28th at Carstairs United Church at 5 p.m. A reception was held at the Empress Hotel, Calgary at 8 p.m. His wife, the former Cpl. Evelyn Stewart, had three years of army service to her credit. Congratulations for a long and happy married life, Evelyn and Dick from his all at Burnside.

LOCAL NEWS ITEMS

Mrs. Dean Crandlemire, accompanied by her brother, Mr. Kiffer Stauffer, went to Calgary to meet her husband, C.S.M. Dean Crandlemire, who arrived home from overseas Saturday.

Mr. and Mrs. J. Holub announce the engagement of their eldest daughter, Anne, to L. Cpl. Frank Bullis son of Mr. and Mrs. J.A. Bullis of Foremost. L. Cpl. Bullis has recently returned from four years overseas service. The marriage will be announced at a later date.

THANK OFFERING AT THE EVANGELICAL CHURCH

On Sunday evening the Evangelical Ladies Aid and Women's Missionary Society conducted a public thank offering meeting in the Evangelical church. Mrs. J.V. Berscht as president was in the pulpit, and Mrs. E. Deadrick and Mrs. W. Irwin read the scriptures.

Mrs. A. Amer preached a very stirring message on "Thankfulness" and the ladies sang two missionary songs.

A splendid offering was received for missions.

NEW RINK CONSTRUCTED BY NEAPOLIS COMMUNITY

Ground has been levelled and a fence put up for the skating rink which has been constructed just north of the house at the Neapolis Cheese Factory. This undertaking is being sponsored by the Neapolis Skating and Curling Club, which plans to construct a two-sheet curling rink in the near future.

BERGEN NEWS NOTES

Leonard Meckelbourgh and family are spending a few days in Calgary.

A shower and charivari was held on Monday night at Mr. Lund's place for Wesley Lund and wife who were recently married.

Olaf Haug and wife are visiting at Bergen. Olaf was married in New Westminster.

F.O.R. Paul and father were present on Wednesday for the shower held for him and Jean Clemens. The house was well filled.

A sleigh load of Bergen folk attended the services at Sundre on Sunday evening. The young people from the Bible School held the services.

Rev. O. Snyder held quarterly meeting at Bergen on Sunday.

Leslie Lyle bought Louie Lund's interest in his saw mill.

F. Platz has returned to his job at Crystal Dairy after being away for a week recuperating after receiving facial burns when a steam hose burst.

Rev. A. M. Amacher was a Calgary visitor Tuesday.

A. E. PREVOST PURCHASES HIWAY SERVICE GARAGE

A.E. "Bert" Prevost, who has had 18 years' experience with MacIn Motors in Calgary, has purchased the Hiway Service Garage on the highway east of Didsbury, from Mr. Wesche, and has now taken over the business.

Mr. and Mrs. Prevost and two daughters arrived last week and have now taken up residence in the living quarters at the garage.

Mr. and Mrs. Kelly, also of Calgary, have arrived in Didsbury and Mr. Kelly will work for Mr. Prevost in the garage. They have purchased a small house and are moving it to the property on the highway.

MELVIN NEWS NOTES

A.C. Allan Chandler left on Saturday to report at Cornwallis after spending a twenty-eight day furlough with his parents here.

Mrs. D. Landeen and little girls are holidaying with relatives and Mrs. Landeen's sister, Mrs. C. Y. Howlett, in Calgary.

On Thursday a social evening was held in the Melvin hall in honor of the Melvin boys in the services.

An evening of miscellaneous entertainment, including stunts, songs and speeches, was thoroughly enjoyed by everyone. After lunch they danced to the music of the Merry-makers.

Each returned man was presented with an autograph album from the district and albums were sent to service boys who were not able to be present.

SMART FOLKS

The F.A.O. Conference

THE RECENT CONFERENCE of the Food and Agriculture Organization of the United Nations held in Quebec City, was of great interest to the people of Canada. Agriculture is one of our largest industries and any matter which concerns it also concerns the interests of a very large part of the population here. The object of the Food and Agriculture Organization is to ensure freedom from want or hunger for all the people of the world, through raising the levels of production in agriculture, forestry and fishing, and at the same time organizing proper distribution on a world-wide basis. This is the first of the United Nations organizations to be set on a permanent footing and it is clear that more considerable bearing on the future of the world fields of international cooperation which have been planned by the United Nations.

Surpluses To Be Distributed

One of the fundamental objects of the Organization is to raise nutrition levels in all countries, and to plan the distribution of food so as to avoid surpluses in one part of the world, when there are shortages elsewhere. In the past, we have too often seen great surpluses of Canadian wheat remaining unsold, while there were food shortages in other parts of the world. The situation has not applied to Canada alone, but has been experienced by many nations, and it has been detrimental both to the producers of the surplus products, and to the people who have been in need of them. It is hoped that in the future these conditions will be avoided, and it is clear that more equitable and efficient distribution would be an important step in building up international goodwill, and increasing the well-being and prosperity of individual nations.

Information To Be Furnished

While the work of the Food and Agriculture Organization is to be concerned with international problems, the needs and interests of individuals are also considered to be important. Information regarding advanced methods of farming and soil improvement programs, credit, cooperation and numerous other matters will be furnished to farmers. It is also proposed that representatives of the F.A.O. will keep the farmers' interests before individual governments in respect to marketing and other important matters. It was significant that Canada, as one of the world's greatest food-producing nations, was chosen as the meeting place for this conference, and that Canadian agricultural experts took a prominent part in all the discussions. It is now Canada's responsibility to do this in all the discussions. It is possible to make a success of this first effort towards practical international cooperation growing out of the United Nations organizations. It is a difficult task, but one which may be a great benefit to the world.

IN A CRACKER IT'S

Mounted Police Dog

Now Used Successfully In Tracking Down Criminals

A sleek, three-year-old Doberman-Pinscher named Prince tracks his man down and holds him just like the Canadian Mounted Police.

The force's annual report cited Prince as a good example of the efficiency of the Mounted police dog service.

In the 12 months ended March 31, 1945, Prince has helped on 79 cases, travelling 3,500 miles—mostly in the Maritime.

He was taken to Port Hood, N.S., June 28, 1944, to help locate persons responsible for a series of burglaries. A stolen bike was finally located and Prince put on the track. He led the police to a camp where the remainder of the stolen goods was found.

Given the scent of a blanket, he immediately set out through the bush and soon located a man and held him by the pants leg until the police arrived.

Later he led police to a haystack where a second stolen tow found sleeping. Both men were eventually convicted. Some of Prince's pals are "Roady", "Chips", "Rough", and "Smoky"—all good trackers—Gottawa Journal.

MADE GOOD TIME

According to the British air ministry, the first glider tow across the Atlantic ocean was made in June, 1943. The entire flight from Montreal to England took only 23 hours.

Gold was first found in Idaho in 1860.

Price Control And Rationing Information

Q.—Will my husband be given canning sugar coupons, if he returns from overseas within the next few weeks?

A.—The preserves coupons, which also are used for the purchase of canning sugar, will be increased by 10 for returning servicemen applying for ration books between October 31 and December 31. This will entitle the ration book holder to five pounds of sugar, in addition to his regular supply.

Q.—Will I be able to buy a double-breasted suit this fall?

A.—Double-breasted suits may now be ordered, if you wish to purchase that particular type. Production of men's suits in Canada this year is expected to be approximately five per cent. higher than in 1944. Over one-third of the suits are, however, being reserved for sale to demobilized servicemen.

Q.—Is it right for a storekeeper to take out coupons which have not been used leaving just the valid coupons in the ration books?

A.—No. You should remove and destroy any unused coupons in your ration books.

Q.—My lady friend told me that she had received a booklet from your office which gave her instructions on how to remake a gentleman's suit into a lady's suit. Would it be possible for me to have one of these booklets?

A.—I imagine your lady friend was referring to "Miracles of Make-Do". I have mailed out a copy to you. This book gives many suggestions on re-making of clothing.

Please send your questions or requests for the pamphlets "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

GEMS OF THOUGHT

CONTENTMENT

Contentment is true riches.—Dulany.

Contentment is a pearl of great price, and whosoever procures it at the expense of ten thousand desires makes a wise and a happy purchase.—Dulany.

You traverse the world in search of happiness, which is within the reach of every man; a contented mind confers it all.—Horace.

All power and happiness are spiritual, and proceed from goodness.—Mary Baker Eddy.

The occurrences that come to a man are the fruit of his own character.—Emerson.

The noblest mind the best contentment has.—Spenser.

WRIGLEY'S

Colder Winters

Government Astronomer Says Sun Spots Are Affecting The Weather

Weather experts at the Dominion Experimental farm took a long look at their maps and charts and then agreed more or less that this winter will be cold—colder at least than last. Dr. R. S. DeLury, government astronomer, blames it on sun spots. While emphasizing that nothing was very certain about the weather, he noted that increased cloudiness induced by sun spots should mean increasingly cold winters for the next four or five years until solar disturbances enter a new phase.

TRIBUTE TO R.C.A.F.

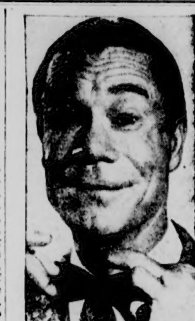

Newman's row in Lincoln's Inn Fields, an area of London where the R.C.A.F. had its headquarters during the war, has been renamed Canadian Walk in a ceremony. Following unveiling of two plaques at either end of the road, the mayor of Holborn, Wilfred Holden, walked along it with Air Marshal G. O. Johnson. A band played "The Maple Leaf Forever."

MEET A CWAC—

The eighth girl to join the Canadian Women's Army Corps in Saskatchewan is the record of 8 Sgt. Teresa Hoskins, Broadview, Sask. Joining the CWAC in Oct. 1941, Terry was posted to Documentation, No. 12 District Depot, later working in Drafts and Discharges and also in Central Registry. In July of '42, Terry was promoted to the rank of corporal and in December of the same year became a sergeant. In July '43, the first draft of CWAC was made up to join the Second Echelon, Canadian Army Pacific Force with headquarters at Brockville, Ont. "On the strength of being one of the chosen few, I gave most of my warm clothes away," said Terry. "You see we had a grueling schedule." The medal, highest open to U.S. civilians, has been awarded only one other civilian, the late war correspondent, Ernie Pyle.

WINNIE U.S. BRONZE STAR—Joe E. Brown, screen comedian, has been awarded the Bronze Star medal for meritorious service in entertaining troops in adverse weather and during a grueling schedule. The medal, highest open to U.S. civilians, has been awarded only one other civilian, the late war correspondent, Ernie Pyle.

Free To Teachers

New Booklet On Visual Aids In Education, Being Distributed

"Learning Unlimited" is the title of a new booklet being distributed to educators by Associated Screen News, of Montreal and Toronto. Published by the makers of Filmo motion picture equipment, the booklet is designed as a guide for utilization of films in the classroom. It has particular value for these planning new or extended uses for visual aids to teaching.

Subject matter includes chapters on preparing to use motion pictures; physical facilities required; selecting, evaluating, and obtaining films; school-made motion pictures; how to insure good projection, and a recommended reading list.

Copies of the booklet may be obtained without charge by teachers and others interested in visual aids in education by writing Associated Screen News, 1330 Sherbrooke St. West, Montreal, Que. This is the third of a series of booklets to aid in better utilization of films. Other titles in the series are "Architects Visual Equipment Handbook", for use in planning new construction or renovation of classrooms; and "Acoustic Treatment of Auditoriums".

World Standard Time Was Devised By A Canadian After Many Years Of Hard Study

(By Vincent Brown)

THE phrase Greenwich Mean Time is familiar to millions of people throughout the world, and it is hardly understood that the standard time used today in all parts of the world is based on Britain's Thames-side borough of Greenwich. But how, precisely, can the fact that a Turkish business man, who finds his watch two minutes slow and puts it right, bear any relation to a small borough in faraway England?

The answer involves a brief dip into British history on the one hand and world history on the other. A hundred years ago in Britain, different places based their own time on the movements of the sun. When the sun was directly overhead at Greenwich, then the hour was 12 o'clock, and they set their clocks accordingly, but as the earth revolved, the time at which the sun was directly overhead varied in different places. In fact, noon was later by four minutes for every degree of longitude towards the West. This did not greatly bother the people of England, but when railways appeared in England and travel was speeded up, then they found that Pendance time (Pendence on the south coast) was half an hour out of London time by as much as 20 minutes, so that passengers who wanted to travel to London on the 10 o'clock train had to be at the station by 9.40 local time.

At first they compromised with this situation. The railway stations in the 1850s on British railway stations gave both the local and Greenwich time. This led, on one occasion, a barometer arrived at Dorchester by local time, and losing his case because the court had already sat by Greenwich time. However, he appealed, and the decision was reversed on the grounds that local time was the lawful time.

One thing soon became obvious from all this. Such confusion of time, multiplied throughout the whole country, would have to be brought down to one common framework if the railway and the postal and telegraph time-tables, and professional and business men were to know where they stood.

So, in the year 1850, Britain became the pioneer for a universal time formula and the time at Greenwich, London, was adopted throughout the whole country by the railway systems.

Later, other countries followed Britain's lead and generally they tended to take the time at Greenwich as standard time, their capital cities by the railway systems.

But now international travel speeded up and the problem which had arisen internally in the different countries, now spread externally between these countries. Similar, but far more pronounced, variations in time occurred all over the world. In proportion to the distance travelled, this variation might amount to several hours. The problem was solved when the telegraph and telephone system came into being, because it was perfectly possible for a telegram to arrive before the message had been sent. At the time of the telegraph, the time of the telegraph was compared with the time of arrival based on French time.

At this point in the history, Sir Sanford Fleming appears on the scene. Born in Kirkcubright, Scotland, Britain, in 1827, Sir Sanford Fleming, a Canadian, was a civil engineer and surveyor. In the course of his work building railways, he became deeply interested in the problem of time. He found that the wide variation in the time scales were confusing to everyone, and he puzzled over the problem for many years until, finally, with true Scottish persistence, he worked the thing out. The answer apparently came to him quite suddenly one day. It ran like this:

There are 360 degrees in a circle and the earth is roughly spherical. There are also 24 hours in each day. If the 360 degrees are divided by the 24 hours, the result is exactly 15. So Fleming proposed the creation of a series of 24 time belts around the globe with a width of 15 degrees each. Each one of these would then be equivalent to one hour in time and we should then have a precise measure of time over the whole of the earth's surface.

He put his solution before the Royal Canadian Institute and demonstrated its possibilities with such vigor and lucidity that they immediately agreed to give the idea their backing.

Now came a period of unexpected difficulties. The very simplicity of Sir Sanford's idea might have recommended it to the least progressive Government but there remained some remnants who, for one reason or another, were unconvinced of the necessity for a change.

It needed another conference in 1884, held at Washington at the invitation of the U.S.A., before one by one, the major and minor powers accepted the scheme. So today, Cairo, Alexandria and Ankara use both of Sir Sanford Fleming's time belts to standardize their time.

But this is the interesting point. The principle of standard time which began in Britain at Greenwich, and

developed through Sir Sanford Fleming's plan to cover the world, eventually came back to the starting point at Greenwich. It was generally agreed amongst the nations that the invaluable work carried out by the Royal Observatory at Greenwich made it reasonable to honor Greenwich by adopting the borough as the world's meridian, or the starting point for measuring time. Today the spot where the meridian actually crosses the borough, is marked at the Observatory by a white line.

Science Service

Maintain Research Divisions For The Benefit Of Agriculture

The work of the Science Service, Dominion Department of Agriculture, is directed toward the solution of practical problems of agriculture through the application of scientific investigation. The Service is responsible for the maintenance and development of the National Collection of Insects, the Dominion Arboretum, and an excellent herbarium. It deals with problems relating to the ravages of insect pests and diseases affecting plants and animals, the deterioration of plant and animal products through the invasion of fungi and bacteria, the nutritional requirements of plants and animals, and the chemistry and microbiology of soils, feeds and dairy products.

The Service carries out chemical and biological determinations required in the administration of various Dominion Acts and Regulations, and administers the Insecticide, Fungicide and Pest Act, including the inspection of imported and exported plants and plant products, and the establishment of quarantine and control measures for introduced pests and diseases. The work in the various Dominion Acts and Regulations is co-ordinated with agricultural research undertaken by the Experimental Farms Service and by other divisions of the Department of Agriculture, and with certain special research projects undertaken by the National Research Council and by universities and colleges of agriculture.

The Science Service includes the research divisions of Animal Pathology, Plant Pathology, Entomology, and Plant Protection. Centralized accounting and personnel services for these divisions are maintained in the Administrative Division.

Australia Wants People

Migration Plans Include Veterans And War Orphans From Europe

Australia hopes to get 20,000 European war veterans, in accordance with the Immigration Minister, Caidwell, said that Australia might seek 20,000 Poles who have been serving with the R.A.F.

Migration plans also include bringing to Australia of 20,000 European war orphans. Some of these are to come from Britain but it is expected that most will be from the Continent.

Mr. Caidwell has put Australia's maximum absorption capacity in food lands at 20,000 a year. It is hoped that the 20,000 children will reach Australia within three years.

The Minister has also stated that a migrant will be assisted or encouraged to travel to Australia unless his or her economic future is reasonably assured. Much depends on post-war prosperity.

THE ENGLISH TONGUE

When the English tongue we speak, Why is "break" not rhymed with "speak"?

Will you tell me why it's true, We say "new" but likewise "few"?

And the butcher of verse, Cannot can his "horse" with "course"? "Beard" sounds not the same as "heard".

"Good" is different from "word", "Cue" is long but "due" is short. "Shoe" is never rhymed with "toe", Think of "house" and "dose" and "go".

And of "good" and also "hood", Think of "youth" and "truth" and "bud", "Doll" and "roll" and "home" and "one".

And since "pay" is rhymed with "say", Why not "mail" with "sail", I pray? We have "blood" and "food" and "good".

"Mould" is not pronounced like "could", Wherefore "dome" but "gene" and "June"? Is there any reason known?

In 400 B.C. Archytas of Tarentum made a wooden pigeon that could fly.

MANLY F. MINER, WILHELMINA MINER, TY COBB

It is doubtful if any private home in America ever attracted more famous personalities than has the home of the late Jack Miner, Kingsville, Ontario. Men and women in every walk of life have been seen in the home of the late Jack Miner, who was known as "The World's Famous Bird Sanctuary". He was a man of many talents, a successful businessman, a community baseball diamond and club house for the boys and girls of the community. Jack Miner used to say, "Every farmer provides a place for his boys to run and play, why shouldn't I provide a place for not only my boys but the girls and boys of my community?" For years his household diamond and clubhouse attracted the attention of many famous outdoor sportsmen, among them was the world famous baseball player, Ty Cobb. Although his friend Jack Miner has passed on, yet Ty continues to visit Canada for no other reason than to visit the Jack Miner Bird Sanctuary. Photo shows most recent photo of Ty Cobb in Jack Miner's back yard with Manly F. Miner, Jack Miner's eldest son, and Wilhelmina Condon Miner, Jack Miner's only granddaughter.

Renowned Scientist

Girl Who Loved Arithmetic Grew Up To Become Famous

WASHINGTON. An illustrious, little girl who slept with her second-grade arithmetic book under her pillow is preparing to compete for the U.S. Academy of the woman who ruled the world.

She is Lise Meitner who grew up to become atomic energy. She became the most renowned scientist.

At 66 years of age, Dr. Meitner is still active. She weighs about 160 pounds and lives at most level two on her top floor.

Little Lise was a child in Austria. She liked to sleep with her second-grade arithmetic book under her pillow as an older girl deep on wedding cake. As she did her homework, she was also a memorized dates and theories.

In her teens, Lise Meitner gave parts of her book to her father, a chemist, who was a taken party to her ideal of freedom. She battled her way against the anti-feminist sentiment of the 19th century to the top of the scientific ladder. In 1917 she was serving as head of the radio activity department of the Kaiser Wilhelm Institute. She got her citizenship from Austria to Germany despite the loss of money in 1933. Dr. Meitner has always wanted to come to the U.S. because U.S. ideas embodied her own scale of freedom.

The rapid advance of the Hitler regime, however, made her go instead to the Netherlands in 1938 with only two marks in her pocket to avoid the Nazi yoke.

Now Lise Meitner is credited with supplying the Allies with the secret unbreakable weapon of war: the release of atomic energy.

Wheat Harvests

Every Month In The Year Around The World

There is not a month in the year in which a wheat harvest does not take place in some part of the world. Below are the dates of the wheat harvest in various countries:

January: Australia, New Zealand, Argentina, Chile, February: India, March: India, Upper Egypt, April: Mexico, Cuba, Lower Egypt, Syria, Persia, Asia Minor, May: Morocco, Algeria, Tunisia, northern parts of Asia Minor, China, Japan, Texas, Florida, June: The Mediterranean peninsula and south of France, California, Oregon, Utah, and the greater part of central and eastern United States (terminates south of 40 degrees, Afghanistan, Japan, July: France, Austria-Hungary, Southern Russia, the northern parts of the United States, August: Canada, England, Belgium, Netherlands, Germany, September: Scotland, Sweden, Norway, Russia, October: Finland, Northern Russia, November: Peru, South Africa, December: Burma, South Australia.

A BELGIAN TRAITOR

Nicholas van Canpenhoof, who numbered nearly \$2,000,000 selling bells taken from Belgian churches, was convicted by the high court of selling the metal to German munitions firms during the occupation and was sentenced to life imprisonment.

The architect covers his mistakes with ivy and the physician with gold; the bride must rely on many maidens.

Lifting The Veil Of Secrecy About The Jet Propulsion Gas Turbine Aeroplane Engine

(Rolls-Royce Technical Service)

It is now possible to lift the veil of secrecy which has shrouded the jet propulsion gas turbine engine. Although a limited amount of information has been released on aircraft powered with such engines, details of the engine themselves were, during the war, a "top secret".

Concepts Of Justice

Must Be Changed In The Hearts Of Men To Avoid Future Wars

One thing this generation should know beyond any question, one thing that should have been drilled into our consciousness through bitter and tragic experience, is the knowledge that education can be a great deterrent of action, an overwhelming force for evil or for good.

Once we used to believe that education was a great blessing; now we know that it is not necessarily so. We have seen how Hitler's youth, schooled in a corrupt vision, continued to believe in that vision in the face of mounting world of evidence that the vision was destructive and deluded. More recently we have learned how the training of Japanese youth conditions them for war, training them to be efficient in its arts, deluding them into a fanatical belief that war was a virtue.

Great and far-reaching as was the damage done by this training, it is only part of the score. Even the dreadful toll of human suffering and death and destruction is not the whole of it. The use of atomic bombs, the dehumanization of Germany and Japan have set their mark upon a world, disturbing the minds of whole generations.

The starting of the engine from the pilot's point of view is also very simple, as it is completely automatic. Apart from the normal openings of fuel cock and starter, there is no need to press the starter button. From that point on, the starting is controlled automatically by a time relay which is set to start the engine initially by means of starter plugs which give a continuous spark, and the engine starts to run.

There is none of the uncertainty in starting the jet engine which often starts with the pilot engine as the pilot always starts the engine the first time unless there is something definitely wrong. There is no personal element involved and skill and experience do not enter into the starting process. You see it in the fact that world revolution is a fact, that we cannot move back to the comfortable familiarity of days past, but must move forward to a future that is in our own untutored hands. In the face of this world-wide devastation and of the billions in lands that have not felt the actual impact of war, it is not hard to understand the impulsive and headlong thinking that has resulted, or to realize that humanity must find a new set of values on which to base its thinking or sink into chaos, the only alternative.

There is a revelation the world has faced the tragedy of war. Sober men, noting its mounting ferocity, have doubted whether the world would survive another such conflict. Yet another war there will be unless there is some change in the hearts of men. And it seems that the best and most certain way to effect such a change is to substitute for the kind of education that can lead only to war, the kind of education that leads to peace.

Non-Germans and Fascist Italy, and Japan with its emperor worship, all taught a dedication of the state to which all religious and all educational programs should adhere. The weakness of their cause was that they were bankrupt in those spiritual values which are the basis of the peace on earth and good will to men. The purpose of the Educational Week on which we are entering is to re-assess these values, for on them alone can be founded the concepts of justice and faith and brotherhood and good will on which the peace and permanence of our civilization depend—Liberty Magazine.

New Cruisers

Britain's New Top-Secret Cruiser Has Been Launched

The first of Britain's new top-secret cruisers, the Superb, has been commissioned.

Armaments and radar fire-control systems of the 800-ton cruiser, one of the "Tiger" class, were covered by canvas screens. The ship, the Superb, Defence and Tiger—have been launched but only the Superb has been commissioned as yet.

Information disclosed shows they carry nine guns of six-inch calibre, 10 high-angle four-inch guns and an unexplained number of short-range anti-aircraft weapons. Their speed is expected to be at least 35 knots.

Marlin and tuna often hit a 45-mile-an-hour speed in attempting to escape after being hooked by the angler.

Made In Two Pieces

Two in a revelation the world has faced the tragedy of war. Sober men, noting its mounting ferocity, have doubted whether the world would survive another such conflict. Yet another war there will be unless there is some change in the hearts of men. And it seems that the best and most certain way to effect such a change is to substitute for the kind of education that can lead only to war, the kind of education that leads to peace.

ANOTHER TOWN TO BE MODERN

People in the Towns of Alberta all seem to be of one opinion these days, and that is to have modern water and sewage facilities, which provide one of the greatest enjoyments of life together with sanitation and healthful surroundings.

The latest town to vote on water and sewage was the Town of Three Hills, and the by-laws providing for this improvement passed almost unanimously at the vote taken on Monday of this week.

Didsbury is next on the list, and the vote of the rate-payers for the project? Of course we are. Every town voting payers will be taken on January 21st. Are we going to vote on water and sewage so far this year, Innisfail, Vulcan, Olds and Three Hills, have all been unanimous in their decision to provide modern facilities for the citizens, and we in Didsbury must do the same, or be classed as 'has-beens'.

Didsbury as a town is progressing rapidly, and will continue to make progress with modern facilities. Let's all make up our minds now to vote for the water and sewage by-laws on January 21st.

RELAXING CONTROLS

Do we realize that Canada's cost of living has risen less than that of any other country? Canadians are the best fed people in the world. Because of everyone's co-operation, our government was able to subsidize essentials such as milk and oranges, making the necessities available to all. One hears on all sides: "The war's over now. Why doesn't the government get busy and remove these controls?" But are we, the people of Canada ready for the lifting of controls?

Are we mature enough to have unrestricted buying power put into our hands? Have we the inner control necessary? Or will we indulge in an orgy of spending, and end up with a depression? A sound economy depends on sound people, people who give honest measure whether in weight or work, who care about their neighbors, whose policy is not "grab" and "greed."

To quote Donald Gordon, Chairman of the War Time Prices and Trade Board: "In the reconversion of our economy each segment of the economic structure has its part to play and every citizen will have to bring all his intelligence and realism to bear on the task". How long the controls will last will depend "on the degree of restraint shown by the public in the use of accumulated purchasing power".

Through disciplined use of controls comes our opportunity to show that our patriotism is not a feeble but a burning passion. Our dollars properly spent can help to build confidence, enterprise and national security. So shall such a spirit grow within all Canadians that, when controls are relaxed, there shall have been bred in us the consciousness of our individual responsibility in our country's economy.

MONS CHAPTER I.O.O.F. TO SPONSOR DANCE DEC. 31

A dance will be held in the Didsbury Queen Hotel on Monday, December 31st, under auspices of the Mons Chapter I.O.O.F., and the Acme Victory Orchestra has been engaged to furnish the music. Tickets will be on sale next week and advertising material has been prepared for distribution. Watch for the posters.

Many airmen who trained under the British Commonwealth Air Training Plan formed permanent ties with Canada. More than 3,750 members of the RAF, the RAAF, the RZNAF and allied nationals under RAAF quota married Canadian girls.

MEN URGENTLY NEEDED IN LUMBER INDUSTRY

Winnipeg, November 20th. — An extensive campaign to meet urgent labor needs in the woods industry has been developed by the Department of Labor. At least 30,000 more men than are now engaged in this industry must be secured as soon as possible, it was stated.

Fred J. White, Regional Superintendent, Unemployment Insurance Commission, Winnipeg, revealed that in the Prairie Region alone, 8,000 men are needed for lumbering or pulpwood cutting. "Canada's number one item on its peacetime program is the construction of homes for our returning veterans. Labor is needed for these homes and every person who accepts employment in the woods industry is making a real contribution to this program. Never in the nation's history has the wealth of our forests been in such urgent demand as it is today," he said.

In addition to the need of lumber for home building in Canada and for the reconstruction of Europe, huge quantities of pulp and paper industry. "The manufacture of paper and newspaper is most important both for our own use and for our export trade," Mr. White said.

The recruiting campaign will be carried through the National Employment Service with the assistance of Provincial Agricultural Officials working under the Dominion Provincial farm agreement. The appeal is being directed both to urban and rural workers with a particular emphasis to farmers and agricultural workers who can be spared from farms during the winter slack season.

"Wages are good and operators have greatly improved camp accommodation during the war years. In most cases employers are paying the cost of transportation to the place of employment," the Regional Superintendent stated.

CHRISTMAS IS NOT MEATLESS

"Meatless Tuesday" ruling will be rescinded for Christmas Day and New Year's Day, both of which fall on Tuesday, the Wartime Prices and Trade Board announces.

Making an announcement, Prices Board Chairman Donald Gordon explained that the amount of meat which is normally served in Canada as a supplement to the regular "turkey dinner" is so small that enforcing the regulation would cause more annoyance than the saving would warrant. Also, Canada's exports of meat have increased steadily since rationing was reimposed, and deliveries would not be seriously affected by allowing a small amount for holiday festivities. Though the meatless day restriction is relaxed for Christmas and New Year celebrations, prices must be in line with 1944 levels.

PIN UP SHEET OF FEEDING NEEDS FOR BARN WALL

Prepared for dairymen by Dr. J. E. Bowstead, University of Alberta, a new "pin-up" sheet for the barn is now ready for distribution.

Dr. Bowstead, in charge of the dairy section of the University for over 23 years, has prepared a barn sheet that can be posted on the wall and referred to for almost any kind of dairy information. The sheet contains simple rules for feeding of cows and calves; suitable grain mixtures; suggestions of the use of minerals; special treatment for the cows at calving time; advice on disease treatments; common causes of low grade milk and cream;

gestation table, and even suggestions on the best way to milk cows. A copy of the barn sheet can be obtained from District Agriculturalists, the Extension Service of the Alberta Department of Agriculture or the Department of Extension, University of Alberta.

WOODEN PROPELLER BLADE

A United Kingdom company has developed a new light weight propeller blade of a die moulded compressed wood which is twenty-five percent cheaper, and in many ways superior, to the best type of metal blade and will also enable air lines to carry eight additional passengers.

Put more
LIGHT
on the
SUBJECT!

Don't strain your eyes unnecessarily. It is poor economy to save on light at the expense of your eyesight. Use adequate light at all times, and have it correctly placed so that it falls on your work or whatever you are doing.

Move lamps and furniture together so that the light is working for you, not you for the light. Also be sure to provide adequate light, correctly placed for children to study by. Don't let them strain their eyes using a light that is either too harsh or too dim.

Be sure to clean lamps and reflectors regularly. You will get from 25% to 50% more light. A damp cloth will clean bulbs (be sure they are dry before switching the light on) and soap and water is best for dusty bowls and reflectors. Discard those dark lampshades and replace them with light colored ones which reflect the light.

Archie Boyce **C.E. Reiber**
Auctioneer Clerk

"What's the cat's name?"
"Ben Hur."
"How did you happen to choose
that?"
"It was just Ben before she had
kittens."

"You seem to be busy," mention-
ed a lady upon meeting her neigh-
bor at the store.
"I certainly am," replied her
neighbor. "You see, I'm trying to
get something for my husband."
"Had any offers yet," came the
reply.

A sailor was cast away on a
desert island. After he had been
there for nine years, he awoke one
morning and saw a lovely young
woman floating toward the beach
on a barrel. The barrel washed
ashore and the woman approached.
"Hello," she said. "How long
have you been here?"
"Nigh onto 10 years," said the
sailor.

"Gracious," said the woman.
"Then I am bringing you some-
thing you certainly haven't had in
a long time."
"Well, bust my leg!" exclaimed
the sailor. "Don't tell me you got
beer in that barrel!"

The big garage operator had died
and gone to—well, not to heaven.
But hardly had he settled down for
a nice long smoke, when a hearty

WEDDINGS

LUCASINKAS—CIPPERLY

A pretty wedding took place in
Central United Church, Calgary, on
Wednesday, November 14th, when
Miss Pauline Lucasinkas of White
Fox, Saskatchewan, was united in
marriage to Mr. Lloyd Cipperly
of Didsbury. Gowned in white
sheer with shoulder-length veil and
silver slippers, and carrying a bou-
quet of American Beauty Roses,
she was attended by the groom's
sister, Mrs. Herb Zeigler, who was
dressed in rose sheer and carried
pink carnations. Mr. Herb Zeigler
was best man.

After a brief honeymoon in Cal-
gary the happy couple returned to
Didsbury, where they will make
their home on the bridegroom's
farm east of town.

PAUL—CLEMENS
In the glow of candle-light at
Central United church, Calgary, on
Saturday evening, Jean Phyllis
Clemens, daughter of Mr. and Mrs.
G. Harold Clemens of Bergen, Alta.,
was given in marriage by her fa-
ther to F.O. Reginald V. Paul, son
of R.B. Paul of Edmonton, and the
late Mrs. Paul.

Baskets of bronze and mauve
chrysanthemums formed a floral
background for the double-ring
ceremony which was performed by
Rev. C. Andrew Lawson.
White satin and net fashioned the
bride's floor-length gown which was
styled with a fitted bodice of satin
which extended in points to the
full bouffant net skirt and featured
a sweetheart neckline and long lily
point sleeves. Her full length veil
fell from a Dutch cap of white
satin caught in place with a ban-
dau of violets and stephanotis and
she carried a muff of satin and net
topped with gardenias and violets
with cascade of white satin stream-
ers and clusters of stephanotis. Her
only ornament was a single strand
of pearls.

A Dutch cap entone with her
gown was worn by Miss Jean Mac-
Dougall as maid of honor who was
attired in a floor-length model of
pale yellow sheer complimented
with long lace mitts in matching
shade. She carried a satin muff
similar to that of the bride, topped
with rosebuds and violets.
Li. J. Gordon Cormie of Edmon-
ton, who recently returned from
service with the Loyal Edmonton
Regiment, was the groomsman, and

hand slapped him on the back and
into his ear boomed the voice of a
persistent salesman who pestered
him much on earth.

"Well, Mr. Smith," chorled the
salesman. "I'm here for the ap-
pointment."

"What appointment?"
"Why, don't you remember?" the
salesman went on. "Every time I
entered your office on earth you
told me you'd see me here!"

Rookie: "What's on the menu
tonight?"

Camp Cook: "Oh, hundreds of
things."

Rookie: "What are they?"

Camp Cook: "Beans!"

the guests were ushered by F.O.D.
R. Larrabee and R.C. Paul, brother
of the groom.

Mrs. Phyllis Chapman Clarke
presided at the organ playing "To
A Wild Rose" by request, and dur-
ing the signing of the register Miss
Margaret McIlroy sang "I Love
Thee."

Following the ceremony a recep-
tion for more than 70 guests was
held in the lounge of the Glencoe
club which was decorated with bas-
kets of chrysanthemums and carna-
tions in shades of mauve and yel-
low.

F.O. and Mrs. Paul left later by
motor for a wedding trip to San
Francisco, Hollywood and other
points in California, and will make
their home in Edmonton on their
return.

WANT ADS GET RESULTS

EMERGENCIES arise in any family

Banks are continually making small loans to meet these
emergencies which can upset the best-planned budgets.

Three out of every five bank loans are for less than
\$500. Many of these are used to take care of such expenses
as doctor or hospital bills, temporary embarrassment
at tax-time, a sudden journey, the winter's coal bill.

Again, educational needs of the family often are financed
by small bank loans.

These small loans enable individuals to consolidate
debts, and to pay back from income.

Small loans furnish just one more example of the service
available to you at your bank.

WORLD HAPPENINGS
BRIEFLY TOLD

The train of Heinrich Himmler has been taken to Britain and placed in the Royal College of Surgeons.

Worcester training ship which has been anchored at Greenhithe for 70 years, is being withdrawn from the Thames.

The colonial office has informed the Ceylon government of its interest in the plan to carry out a population census in 1946.

In New London, N.Y., Volunteer Fire Chief William Donahue was accused of starting three fires in order to "make a good showing".

Lord-Innery naval base, Northern Ireland, one of the headquarters of the war against the U-boat, is to become an anti-submarine school.

"Victory Bells", cast from metal from German aircraft shot down over Britain, have been placed on sale in London, with proceeds going to the R.A.F. benevolent fund.

The women's adjustment board has set up a training centre in London for domestic servants. Food cooked by them is served in a restaurant and the proceeds will be used to pay for the training.

New Zealand, with a population of little more than 1,500,000, sent 135,000 men overseas for war service during the Second World War. It was announced. Casualties, killed, wounded and missing, were 37,497, or 28 per cent.

E. Phillips Oppenheim, mystery author of 120 books, is reported to be back at his typewriter for the first time since the fall of France. He has returned to his Gurney house home after spending the war years in England. He is 79.

Crime Wave

Criminals Caught Carrying Guns Should Be Penalized

England, like every other country emerging from the war, is flooded with revolvers, pistols and automatic weapons culled from the battlefields of Europe, Africa and Asia as well. It has had its quota of fatal gun accidents, men and women killed with "unloaded revolvers", but so far at least very few cases of criminals committing robberies while armed. And for good reason.

For decades, magistrates and judges in the British Isles have taken the position that a man found with a revolver in his pocket, whether arrested for burglary or other serious offences is a potential killer — and this whether he actually uses the weapon or not. While it is not set down in so many words in the statutes, the criminal classes there have come to know with absolute certainty that their sentences will be extended by three years, five or even longer if they are caught carrying guns.

This has wiped out the use of revolvers by criminals in Britain entirely. Foreigners and amateur cracksmen are occasionally picked up armed. But to the great bulk of the underworld, the idea of carrying a gun is anathema; they just don't do it.

A system which has worked so well in Great Britain has continued possibilities here in Canada, above all at present when the whole country has gone as gungazey as Central Europe or the United States. If he often knows that the carrying of a revolver when engaged in his depredations will bring long extra years on the road to prison, perhaps a dagger stroke of the "rat" he will think twice before putting the gun in his pocket when he starts out.

It is reported that judges of Vancouver agreed at a recent informal meeting to mete out stiffer sentences to criminals caught while armed. Their example might well be followed by the judiciary all over Canada.

An example of the craze for guns in Ottawa district lately is that of the two 17-year-old youths in Hull who thought it was a very clever and courageous thing to go out on the main streets with guns and hold up a drug store. The apparent ease with which these weapons can be picked up is evident in the statement by one of the youths who pleaded guilty that he had "bought it for \$5 from a man, he didn't know." — Ottawa Journal.

HIS ALLOTMENT

Just before the battle started the commanding officer shouted:

"The enemy is coming men, but we're outnumbered four to one, so do your stuff."

A lean maintenance began to blaze away, but in about five minutes stopped, leaned his rifle against a rock and leisurely leaned back.

"What's the matter?" shouted the officer.

"Well, I got my four," was the reply.

In 1886 Alexander Buntin installed at Valleyfield, Quebec, what is claimed to have been the first wood grinder in America.

The Orientals were the first to make paper.

Vehours is the French word for velvet.

THEIR DESTINATION IS EUROPE—These crated trucks will be sent soon to help the rehabilitation of Britain, France, Belgium and Holland.

Highway Disasters

Speed Should Be Kept Down Until New Tires Are Available

Traffic fatalities reached the grim total of 210 on the first Labor Day week-end after four years of war, according to figures compiled the next day by a press association. This figure doubtless will be much higher when all reports are in.

Such signs and portents clearly show that death will stalk our highways in the months to come. We must turn to the continuous preaching and practice of safety measures to keep down this ghastly and unnecessary toll of human life and limb.

It will be months before new cars and new tires can replace the ancient vehicles and equipment now in use. It will take even longer to build safety into the highways.

Just what are the factors which are making our post-war highways more dangerous than ever before? Reaction from restraint usually takes some violent form. With the gas rationing let off, many drivers who have been "creeping along" at 35 miles per hour will double that speed immediately without considering the condition of their cars and tires.

"Whoopee! Fill 'er up and let's go!" Stated bluntly, the present day automobiles—all of them at least five years old, and their patched, worn, retreaded tires simply can't take it the same as when they were new. Result—disaster! — Road Builders' News.

Public Grants

To Military Leaders In Britain To Be Curtailed

The tradition of making grants to victorious military leaders goes back to the days of the Roman triumph and before. It has been common in many countries and eras.

In England the custom seems to have begun in a large way with Winston Churchill's illustrious ancestor, the first Duke of Marlborough, who after his victorious campaigns in Europe was granted \$22,500 a year for life, plus £10,000 for his public expense for £1,000,000.

The Duke of Wellington was given a castle and more than \$200,000 a year. Lord Nelson's descendants received a perpetual annuity of about \$25,000 a year.

This time, says Mr. Atkin, there will be no cash on the line. Such a policy, he declared, is not in accordance with the spirit of the times or the character of the war.

And he added: "This decision is not to be construed as showing a lack of appreciation for the magnificent services rendered by our military leaders, who have never been surpassed in our military history." — London Free Press.

Good Manners Win

But At Expense Of Your Teeth Says Dental Surgeon

The Chatham Daily News says: If we would just forget that we are perfect ladies and gentlemen, and crunch our food loudly and with vigor at our dining table, our teeth would last longer and give us less wear while we have them. This from a prominent dental surgeon. The doctor explains that there is nothing for the teeth quite so good as bone-picking, toast-crunching, celery-cracking and all the various forms of mastication upon which Etiquette with a capital "E" frowns. Which will win, good teeth or fine manners? It will be a brave man or woman who dares say the former.

BOUNTY OF NATURE

"Men praise the bounty of Nature, but it is much safer to rely on her justice, which as rarely fails to reward our care as to revenge our neglect. We work badly too much ground instead of cultivating well a little." Nicholas Biddle in an address to the Philadelphia Society for Promoting Agriculture in 1809.

ENGLISH TRANSLATION

Allied headquarters in Tokyo directed the Japanese Diet to furnish it with English translations of all legislation at the forthcoming general assembly, including English reports on the progress of the bills through that body.

The major industry with the highest accidental death toll in 1944 was farming.

Farm Property

Many Farm Buildings Are Badly In Need Of Paint

"Don't put it off, put it on," might well be the slogan of many a farmer in regard to paint, for there can be no doubt that a great many farm buildings in Canada are sadly in need of paint.

There are, actually, very few farmers who do not realize the protection which paint gives against decay, rot, rust, disease-germs, lice and mites. The trouble is that most of them have been so busy during the last few years that they just haven't found time to maintain their property in the best way possible. Producing record crops with an unparalleled shortage of help hasn't left much spare time for painting.

Now, however, much of the paint work can't be put off any longer without serious damage to thousands of farm buildings in Canada. Prices are stronger and yields have been generally good in the last few years, but property decay can eat up a lot of the profit unless it is checked. There is no better way to invest part of the increased earnings than to spend it in protecting investments in the form of farm buildings and equipment of all kinds.

Every tractor operator knows that continued operation of the motor depends on that thin film of oil between the piston and the cylinder wall. He knows that when the oil is worn out, the cylinder and piston will be quickly and surely damaged, perhaps beyond repair.

Paint is to the house or barn what oil is to the motor. The thin film of paint reduces the wear that comes from exposure to sun, wind, dust, rain, snow, heat and cold. A building without that protective film will not be destroyed as quickly as an oil-starved motor, but the damage will be just as sure and just as costly even if it does take longer.

Something Really New

British Scientists Have Method For Producing Colored Fur

Something new in the fur world—orange or sky blue rat hides striped with white—has emerged from the research of Dr. Alexander Holliday and K. M. Rudall, British scientists. In the Imperial Chemical Industries magazine Endeavour, the pair announced that while testing properties of a substance derived from the chemical alloxazine they learned how to make white rats change color. The turnout effect can be produced by injection or by mixing the chemical into rat food.

LIFE'S LIKE THAT

By Fred Neher

"It was just as angry about Jimmy eating so much as you are, Papa... It made him sleepy!"

REG'LAR FELLERS—Future Lawyer Loses Case

SUN.	MON.	TUES.	WED.	THUR.	FRI.	SAT.
Roll'd Shoulder of Lamb	Meat Loaf	Lamb Pie	Sausages	Braised Veal Cutlets	Boiled Fish	Liver
Group B	Group C	left-over lamb	Group D	Group B	unrationed	unrationed
3 lbs 2 coupons	1 lb. 4 tokens	4 tokens for 1/2 lb. bacon	3 tokens	5 tokens		

This week's ration fashion calls for an expenditure of two coupons and sixteen tokens. The sixteen tokens are equivalent to two coupons, so that full use is made of the four coupons available each week in a family of four.

If Sunday brings a dinner guest, the rolled shoulder of lamb could be replaced with your favorite dressing and a tempting brown gravy. The left-overs will provide the where-withal for the lamb suggested for Tuesday's dinner. A pound of hamburger stretched with soft bread crumbs will make a meal which can be served hot on Monday and sliced cold for Tuesday's luncheon.

either for the sandwiches packed off to school or work, or for the meal at home along with a crisp salad. You may find you have some tidbits to spare from the roast or loaf which can be added to a spaghetti dish for Wednesday's lunch when sausages will be used for dinner. Braised veal cutlets for Thursday will assure the man of the house that, although rationed, meat can still hold a prominent place on the dinner plate. Fish appears on the Friday menu. For Saturday liver will provide a nutritious, enlivening, and ration-saving meal, leaving you with four tokens to devote to half a pound of bacon, or to carry over as a contribution to sliced cold for Tuesday's luncheon, the next week's roast.

Winged Rockets

Able To Travel From New York To London In Less Than An Hour

Winged rockets equipped with a special 100-ton booster mechanism will be able to travel from New York to London in less than an hour, if current experiments develop successfully. W. G. A. Perring told the Royal Aeronautical Society in London.

The British aeronautic expert said rocket ranges of 1,500 to 3,000 miles "now appear to be possible".

"Flight at over 500 miles an hour is contemplated," he said.

Adoption of winged rockets has raised the current ranges from about 100 to 250 miles, Mr. Perring added. "Even more striking," he added, is the effect of boosters which the Germans were developing after early rocket failures.

"However, I do not want to minimize the difficulties of this problem," he said. "As yet practically nothing is known about control at these speeds, nor of difficulties that will be encountered in passing through the speed of sound."

Churchill's Ambition.

Was To Play Kettledrum Or Be Conductor Of Orchestra

Winston Churchill confessed his one unattained ambition—he wants to play a kettledrum.

Back at his old school at Harrow for a scold with the boys, Britain's wartime Prime Minister said:

"As a youth, I aspired to play the kettledrum, but I was not musically gifted. So I gave up that ambition and transferred my aspiration to another part of the school orchestra. I wanted to be a conductor."

He didn't conduct at Harrow, but as he explained:

"Eventually, however, after a great deal of perseverance, I rose to be conductor of quite a considerable band. It was a very large band and played very strange formidable instruments. The roar and thunder of its music resounded throughout the world. We played all sorts of tunes and ended up the concert with Rule Britannia and 'God Save The King.'"

OUR COMPLETE SHORT STORY—

ALCATRAZ ESCAPE

By JACK CARROLL

Copyright

Wheeler Newspaper Syndicate

A reflected glow from the city lights in the sky reached down to the water's edge and pushed the blackness away from the beach. About thirty yards out, where the night and the water met, the strong white arms of a swimmer slipped in and out of sight. The arms stopped for a moment, the swimmer from water, black eyes keenly surveyed the deserted beach—no shadows near the warehouse.

The face was cradled. Knife-like, with long, lean jaw-bones thrusting forward, like the mouth of a salmon. The eyes were deep black, with an appearance of redness in their depths from the reflection of the light.

Bronson stared at the beach a moment longer, then he resumed his powerful crawl, and a moment later, his male body began to grow out of the water. He grained excitedly. Couldn't he swim, eh? No escaping prisoner could ever escape the currents and the tide in the Bay. They didn't know Bronson.

He went directly to a shed beside the wooden warehouse. He found the bundle of clothes. His muscular body he wiped with the newspapers wrapped around the bundle of clothes. Then he slipped into the dark sports suit, fastened the collar, he searched the pockets till he found the comb; arranged his smooth black hair. He patted the gun, pulled the fedora down over his eyes and began to walk up toward the road.

When he reached it, he turned and thumbed his nose at the far-
away black shape of the Island, his
white teeth showing in silent laughter.
Trying to hold him, Bronson, on an
island! A typical duck's trick.
Everything had worked out perfectly.
Keeling had left the clothes. When
Bronson had told him to. Then, tuning his break, Bronson had

rouled the guards on the north side of the Island, where he had told them to be waiting off-side in the darkness. When he had swum away from the other side of the Island, he had heard the noise of the sirens, the shouts of the guards as the searchlights picked up Keeling in the row boat. He had known that Keeling would be stupid enough to try to flee, and that the machine guns would get him. His body would sink, the guards would think they got him, Bronson. Beautiful.

Meanwhile, thought Bronson, he had a lot of work to catch up on. There was Dillon—he had been getting pretty cocky even before Bronson had got hooked for shooting that top. And he had practically taken over all the black market gasoline since Bronson had been jugged. Stepped right into Bronson's shoes. Bronson felt the gun in his pocket again. Dillon would have to come down a peg.

Dillon sat behind a big desk—Bronson's desk—and watched him calmly from behind a cloud of cigar smoke. His—Bronson's—cigar. Bronson felt his temples begin to pound with anger.

"Yeah," said Dillon, "Maybe that would be o.k. Maybe not. We don't want you to think you're getting a reward, but you're pretty hot right now. The way I been figuring it, you should go away for a while. Take a little rest." He smiled.

Bronson was mad to hear that. He couldn't be angry. He couldn't be careful. He stood up, placing his hand on the desk. That young punk!

"I wouldn't think he just easy."

Dillon shrugged, made a little gesture with his hand. Immediately Bronson felt the hand muzzle of a gun in his back. Two of them.

From a long way off, across that wide deck, Dillon smiled again. Bronson was mad to hear that. He couldn't believe it. Not him, Bronson! He was boss of this outfit!

He refused to believe it while the other two disappeared into the big, black car—one of his cars, and began to drive out the Beach Road, through the fog.

He talked then, rapidly, the sweat pouring from his face and neck, running like lava down his chest, where his heart thudded, frantically. Doubled-throated. Doubled-throated.

They agreed so, but they kept driving out the Beach road, through the fog, and the one-eyed fellow on the left began to unwind the saved-off shotgun.

Then they were standing at the edge of the road, and he was pleading, talking hysterically, throwing the shotgun, while they made ready. The next instant he had smashed the fat man in the stomach, and plunged between the other two toward the Bay. There were curses behind him, they couldn't see clearly in the fog and darkness. Shots. Something red stabbed him in the shoulder, but he didn't feel the hurt. And then the cool waters were closing around him and he felt safe.

He swam straight out for a hundred yards, then he removed his clothes—nearly drowning in the effort. Free, finally, his teeth drew back in a snarl. He'd come through again. He always came through. As he swam, his mind busily began to sketch plans—contacts in Chicago—a few he could trust.

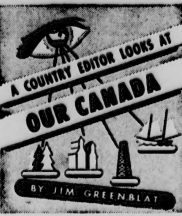

He swam what he thought was parting with the coast, his damnable fog! Make sure he didn't come back there they'd be waiting. Dirty double-crossing rate!

He was weak, near the end of his rope, when he finally came into shore. He had a hard time fighting through the surf, scrambling up the shifting rocks to the shore, tonight. Then through the mid, he saw the black figure against the sky above him, and he was cursing, running, trying to get back at the water.

After that there was the shriek of the siren, the cruel brilliance of the Island searchlights upon him, the beat of the first few machine-gun bullets, and nothing.

FACTORY DESTROYED

United States army engineers have blown up a \$250,000 underground munitions factory at Gelingen, Germany, designed by the Nazis to make parts for the Messerschmitt 262, the last German rocket fighter plane, it was announced.

Our information apparently was
checked. October 6th we reported
the death of George Pocock, the man
who discovered there was coal in the
Estevan, Sask., district. Now, we
learn with extreme pleasure, that Mr.
Pocock's demise was grossly exag-
gerated. He celebrated his 75th birth-
day at Emerson, Man., on August 24,
according to the Emerson Journal.

Newsletters from here and there.
At Sumner, Sask., Mrs. F. E. John-
son thought she had lost \$129 in cash
in an envelope, while at Klara Lutheran
church. A couple of days later,
Mrs. C. Large, rounding up cows out
of town found the envelope on the
prairie, money intact. . . . Reeve Ernest
Miller of Coldwater, Ont., awak-
ened from sleep by a terrific crash
and a burst bedroom window, found
an injured partridge in his room amid
broken glass and blood. . . . An 8-room
house in Pelly, Sask., was ad-
vertised for rent at \$10 a month, and
not a single applicant appeared. Page
Ripley. . . . In the window of the
Cowichan leader at Duncan, B.C.,
posters displayed, "Shooting prohib-
ited," but the editor later pointed out
these were for sale. . . . According
to the Elton, Ont., Express, the Drim-
mie and Smith there was sold to Camp-
bell Richardson of Pergus, who will
ship it to Labrador. . . . Jack Harris,
Maple Creek, Sask., picked de-
licious strawberries on his ranch Oct.
15. . . . Rex Large of Yorkton, Sask.,
produced 56 bushels of No. 1 Thatcher
wheat on the acre on a 13-acre plot.
He used natural and commercial fer-
tilizer. He cut it with a binder. . . .
84-year-old John Wells, Toronto, who
came to Port Rowan for his annual
duck-shooting trip, had not missed
for 34 years. . . . Mrs. Sarah Reese,
East Hill's Harbor, N.S., formerly
postmistress there for 25 years, cele-
brated her 104th birthday recently.

Speaking at Port Severn, at a
conference sponsored by the Simcoe
County Federation and the Commu-
nity Life Training Institute, Dr. Arthur
E. Morgan over from the States said:
"The small community is the most
neglected part of our economy, and
if our democratic society is to sur-
vive we must pay more attention to
its needs and values for our national
life. He claimed if our small com-
munities disintegrate we will have
neither people nor culture, and our
civilization will disappear."

Might break tradition. A To-
ronto doctor wrote to the press con-
demning the practice of sending
flowers to the patients in hospitals.
"It takes up too much time and
money in caring for them. And
now an Ottawa hospital superintendent
said that the average stay of patients
would be reduced one or two days if
unnecessary visits from friends were
eliminated."

Sole survivors of Alberta's first
regulicide, Frank Walker, 75, now of
other frontiers, and W. E. Puffer, 54, met
in the latter's home town of Lacanville
recently and had a swell time remin-
iscing.

Saw 1 saw big things in Dun-
stun, Man., when the first public auc-
tion sale of war surplus material in
the province was held at St. James. In
part, goods included these from
prisoner of war camps and the armed
services, had everything from double-
deck beds to meat choppers and
pillow slips.

The little town of Winkler, Man.,
went over the top and exceeded its
quota of \$125,000 within the opening
hour of the 9th Victory Loan.

Hunting is profitable in Sas-
katchewan, according to the Grenfell
club, which took a local hunt com-
ing home with 12 ducks, 1 mallard,
1 quail, 1 quail of cream, 2 cabbages,
a bushel of potatoes, a side of corn
bacon.

The avocado pear contains more
protein and more dry matter than
any other fruit, and has a high
nutritional content.

THE CANADIAN ARMY

Ross Munro Tells The Story Of His
War Record In His New Book

The Dieppe raid was scheduled to
take place six weeks before it did,
and when bad weather forced its
postponement, troops already em-
barked for France broke down and
cried. Ross Munro discusses in
"Gauntlet to Overlord," the first full
account of Can-
ada's Army given
to the public.

Writing with au-
thority gained from
five years' associa-
tion with Cana-
dian servicemen
overseas, as chief
war correspondent
for The Canadian
Press, Munro has
set down the story
of the Canadians
in a 130,000-word book just published
by The Macmillan Co. of Canada,
Ltd.

Munro reveals the postponement
for the first time in his chapter on
the Aug. 19, 1942, Dieppe attack,
during which he was on or close to
the erupting beaches for eight hours.
Men from the 2nd Canadian Division
were ready for the raid July 4, but
tide and weather conditions had to
be right. There were postponements,
and July 7 was the last day on which
the raid could take place. The heart-
breaking news of the cancellation
came in mid-morning, and Munro
wrote in his diary that he had never
been more depressed.

Six weeks later the same troops
were sent on the raid, "a sudden
decision dictated by the necessities of
the North African landing which was
being planned at the time and sched-
uled for early November." In the
August raid, Commando troops were
used in the task, that paratroops
were given in July, eliminating the
need for such perfect weather condi-
tions.

Munro re-tells the story of the Aug.
10 raid which cost Canada such a
heavy toll of lives, and makes a de-
tailed appreciation of its purpose and
importance on the future course of
the war. "There seem to have been
two purposes," he writes. "The first
was limited intimately with the North
African campaign, which was made
the following November. The second
was part of the main Second Front
planning, which was being started
even at that early date."

The CP war correspondent also
writes of the men and the operations
he saw at Spitzbergen, North Africa,
Sicily, Italy, France, Belgium, Hol-
land and Germany, as the only re-
porter who was with the army from
"Gauntlet" to "Overlord"—the code
names given to the Spitzbergen op-
eration in 1941, and the west front
campaign.

Through chapters replete with de-
tailed accounts of the war, Munro
many hundreds news stories from the
front could not provide in full, Munro
takes the army from its formative
days in southern England to its
mighty climax as a partner in the
allied victory team in Germany.

"The fundamental reason" for Gen.
A. G. L. McNaughton's retirement
from the Army command at the end
of 1942, was conflict between the
general and members of the cabinet
over the question of appointing
the Army, Munro says. Gen. McNaughton's
retirement was concerned with
his desire to keep the Army together
as an entity for the west front cam-
paign, and his opposition to the dis-
patch to the Mediterranean of the 1st
Canadian Division.

Gen. McNaughton originally to bring
the 1st Canadian Division back from Italy
in the fall of 1943, but instead the
Canadian force there was increased
to corps strength. "The Army com-
mander was at variance with this
plan," Munro relates. He opposed it,
and was overruled. In the fall of 1943,
the Army commander, whose health
was never very robust, took ill and
at Christmas it was announced that
he was leaving his army command
because of ill-health.

Munro says that Gen. McNaughton
and the then defence minister, Col.
J. L. Ralston, "clashed practically
every time they met. The climax came
when it was decided to send the 1st
Corps to Italy. Then the differences
between the two burst wide open."

Referring to rumors, current at the
time, that a dispute between Mc-
Naughton and Field Marshal Mont-
gomery led to the Canadian com-
mander's retirement, Munro says that
while it is true the general never
saw eye to eye, "there was no con-
vincing evidence that Montgomery
had anything to do with McNaughton's
retirement."

Munro tells of "subtle criticism"
of McNaughton which developed out
of the conduct of the 2nd Canadian
Corps and the eight months before
the retirement. Although the Corps
was comparatively new and did not
have all its equipment, harsh
comment on the general's tactics
appeared in the official report of the
manoeuvre and were distributed to
various headquarters.

General McNaughton's prestige
was damaged and his standing in the
War Office and in Whitehall suffered,
writes Munro. "This probably was a
contributing factor to his retire-
ment."

Sir William Beveridge, author of
the famous economic theory, called
"The Beveridge Plan," was born in
Rangpur, Bengal India.

SMILE AWHILE

It takes two to make a marriage
—a single girl and an anxious
mother.

"What became of your secre-
tary?"
"I married her and now she's
my treasure."

"Why don't more women take
up the law?"
"They prefer to lay it down."

"He's a self-made man."
"Yes, a horrible example of the
results of unskilled labor."

"I notice that the Boveleys seem
to get along much better these
days."

"Yes, ever since he went home
this summer and saw the girl he
was in love with 20 years ago."

First Soldier: "Why ain't you
going with Mary any more?"
Second Soldier: "Well, she
wasn't pretty."

"I have no money, and married Joe Schultz."
So I just took the advice of my
friends and dropped her."

"If you give me your telephone
number, I'll call you sometime."
"It's in the book."

"Fine, and what's your name?"
"That's in the book, too."

"I was outspoken at the Wo-
men's Club today."

"Humm, Who outspoke you?"

"You say you want a job in this
office. Well, what can you do?"

"Nothing."

"Why didn't you apply sooner?"
All these high-salaried positions
were taken long ago."

Husband (the ingenious type):
"I've invented a new type of
woman's handbag, dear."

Wife (skeptically): "What's
new about it?"

Husband: "The zipper's at the
bottom. Isn't that where every-
thing usually is when you want
it?"

NO, YOU'D NEVER GUESS IT,
but she is a Reconverted WREN,
Martha of Fashion Creators of Can-
ada, designed this soft, pretty two-
piece from a girl's blue serge navy
uniform and Joy Hardy shows it off.
All that happened to this uniform
was the addition of fancy dark blue
braid and the removal of the three
additional buttons which gave the
navy uniform double-breasted style.
The original fine tailoring in the uni-
form is retained.

Overseas Gum Plan

The Absence Of Wrigley's Gum
Puzzles Return Men

The efforts of certain manu-
facturers to meet overseas demands dur-
ing the war resulted in severe short
supply in the domestic market, and
in the case of Wm. Wrigley Jr. Co.,
Limited, it's entire stock of certain
pre-war quality ingredients was en-
tirely used up long before the war's
end. However, Canadian men and
women received chewing gum over-
seas through their Overseas Gum
Plan which was most successfully
operated for the folks at home
through their retail storekeepers, who
forwarded their customers orders to
the manufacturer for direct shipment
to Canadians serving overseas. Re-
turned service men and women are
now looking forward to Wrigley's
promise to bring their famous lines
of chewing gum back to all Canadian
retail store counters just as soon as
it is practical to guarantee top-
quality ingredients and finest flavor
in sufficient quantities.

ACTS 2 WAYS TO RELIEVE MISERIES OF BRONCHITIS

Now get real relief from coughs,
soreness and congestion of bron-
chitis—this double-action
way that actually

penetrates
deep into bronchial
tubes with soothing
medicinal vapors.
STIMULATES
chest and back mus-
cles like a strong
peppermint
poultice.

To reek all the benefits of this
combined PENETRATING
action, put this throat, chest,
and back with Vicks VapoRub
bedtime. Instantly VapoRub goes
to work—2 ways at once as shown
above—to ease bronchitis cough-
ing, loosen congestion, relieve
muscular soreness, and speed
restful, comforting sleep. Often
by morning most of the misery
is gone. Get relief from bron-
chitis distress tonight with dou-
ble-action, time-
tested Vicks Vapo-
Rub—... Try it!

Phone 38 — Didsbury

—Tom Lemon wishes to advise the people of Didsbury that he will have Christmas Trees this year, as usual, at Jenkins' Groceries. 1c

—The Westcott Lutheran Ladies' Aid will hold their annual Sale and Bazaar this Friday, November 30, at Westcott school, starting at 8:00 p.m. Everybody welcome.

Mr. J. V. Berscht left Tuesday evening on a business trip to Winnipeg. He was accompanied by Mrs. Berscht.

Mr. and Mrs. M. Shaw went to Calgary Saturday to meet their son, Pte. Irwin Schmidt who arrived from overseas with the Calgary Highlanders. He was overseas for more than a year and was glad to get back. The City of Calgary gave the boy a grand home coming. On Sunday Irwin went to Vernon, B.C. to meet his family.

—The Builders' have a few Briggs and Stratton Pump Engines.

Among the local boys returning from overseas aboard the Queen Elizabeth, and who arrived in Calgary last week, are: Gnr. J. W. Haug, Bergen; Gnr. A. J. Lucas, Spr. M. Worthington, Csm. D. P. Crandemire, all of Didsbury.

NOTES FROM THE EAST

Mr. and Mrs. Frank Berg and daughter were visitors at the home of her parents, Mr. and Mrs. Morash.

Mrs. W. R. Coates has been taking treatments for an eye ailment in Calgary for the past week.

Mrs. B. Vane is taking chiropractic treatments in Duchess for her back.

Mr. and Mrs. Charlie Kohut motored to Ponoka last Wednesday to visit her parents, and also to take back her sister, Mary Koss, who has been with Mrs. Kohut to help her in moving back to the home place. On Thursday Mrs. Kohut's brother, a sailor, arrived home from Halifax. So they stopped over until Friday evening and celebrated his home coming.

Miss Marjory Burns and brother Harold, both of Calgary, spent the day at their home east of Didsbury.

Mr. and Mrs. Ivan Clindinin are visiting with her parents, Mr. and Mrs. Pete Schumaker, awaiting the home coming of her brother, Jimmie, who is also a sailor. He is expected home Tuesday. Welcome.

Harold and Alfie Thompson went to Calgary Saturday to meet their brother who is arriving back from overseas. Harry was with the first Division of Highlanders. Welcome home, Harry.

Leslie Shields is also expected home soon. When all the boys get back we will be able to sing the "Victory Polka as never before".

Roy Dowell spent the week end at home again, coming up from Calgary with Fred Metz on his return from the convention.

Miss Florence Cullins and Miss Dorothy Davis spent the week end visiting with Mrs. Dowell. On Sunday, Mrs. B. Woods, Kenneth and Claire, along with the other visitors, celebrated Roy's birthday.

Fred Metz had the pleasure of seeing the teachers back to their schools and Roy away on the bus.

Mrs. Harold Shields spent Monday and Tuesday in Calgary. On her return her mother, Mrs. Odden of Landline, accompanied her. She expects to remain with her daughter for a couple of weeks.

Mrs. Spawen of Banff is visiting with her daughter and family, Mrs. Sandy Brander.

Mrs. Sandy Brander and daughter are going to Calgary Monday for a few days.

Mrs. L. Krause, Garth and Marie were Sunday guests at the home of Mr. and Mrs. Charlie Kohut. Messrs. Nick, Jake and Pte. Pete Dick were Sunday visitors with Mr. and Mrs. W. H. Coates. Pete has received his discharge and is making plans to start farming. When asked how it seems to be back in the old familiar places, Pete answered, "Well it is nice to see the old faces and friends, but as to the familiar places, there aren't any. Didsbury has grown, built up and painted until I wouldn't have known it. Also the same old road out East seemed so different, so much improvement, new buildings. Well, to say the least, I was lost".

Last but not least is the Lone Pine W.I. big bazaar and dance on Friday, November 30th. Also a lovely cushion being raffled. Everyone is going to get out and have a time. Buy your wives an apron for Christmas, or a luncheon set for your sweetheart's hope chest. There will be plenty to choose from, and buy them at your own price. Fred Metz will be the auctioneer.

Come to the Jutland school on Friday, December 7th, at 8 p.m. to the musical program of Jutland Christian League. Phillip Paulson, eleven-year-old lad who has just returned from China after three and a half years in a Japanese concentration camp, will be present. Pictures from China and India will be shown by the boy's father.
